

Kentia Palm

Scientific Name: *Howea forsteriana*

Features:

- 1. This plant originates from Lord Howe Island. The scientific name *Howea forsteriana*, derives its name from the name of island (Howea from Lord Howe), and an Australian Politician (forsteriana from William Forster).**
- 2. This plant is an ideal indoor plant because of its air purifying capability. This can remove toxins such as formaldehyde, ammonia, and carbon-monoxide from surrounding air.**
